

Updated Cetane Boost More Convenient

AMSOIL Cetane Boost is now available in new packaging. Like AMSOIL Diesel Concentrate and Diesel Cold Flow Improver, Cetane Boost now comes in a 16 oz. clear bottle with a graduation on the side to ensure correct dosages.

Cetane Boost Benefits

AMSOIL Cetane Boost improves diesel fuel quality to benefit all diesel engines, especially high performance designs. Supported by extensive testing and years of field trial use, AMSOIL Cetane Boost has repeatedly demonstrated its ability to improve diesel engine performance, increasing cetane value by up to seven points. High performance diesel engines operate best with cetane values of 50 or higher.

Better Fuel Economy, Better Performance

AMSOIL Cetane Boost reduces operating costs by increasing fuel economy up to two percent. It improves the spontaneous auto-ignition point of diesel fuel, shortening ignition lag time. This provides more complete combustion for better performance, power and drivability.

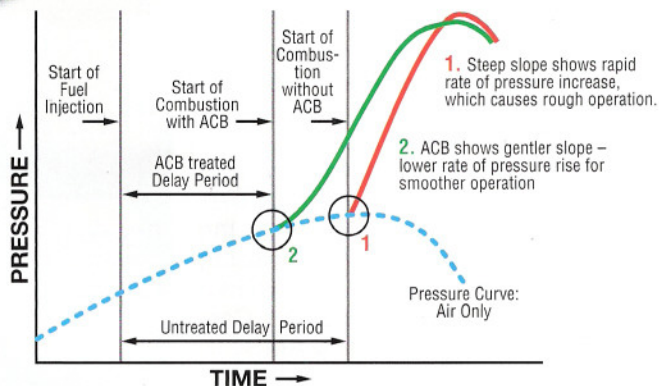

AMSOIL Cetane Boost controls rapid pressure rise within the cylinder, providing quieter, smoother operation. It reduces white smoke, emissions and odors, reducing environmental impact.

Improved Cold Weather Performance

AMSOIL Cetane Boost improves cold temperature starting and reduces misfiring during warm-up and at low temperatures. This reduces engine wear and helps prevent cracked pistons and rings, improving reliability and reducing maintenance costs. AMSOIL Cetane Boost reduces cranking time to start, extending battery and starter life.

See the enclosed price list for pricing information.

Recommendations

AMSOIL Cetane Boost is recommended for use with all types of heavy- and light-duty, on- or off-road and marine diesel engines. Best performance is achieved when used with every new tank of fuel. Cetane Boost is excellent for use with ULSD and compatible with biodiesel and all types of exhaust emission systems such as diesel particulate filters (DPFs). AMSOIL Cetane Boost performs best with petroleum-type fuels. High concentrations of biodiesel decrease the benefits of AMSOIL Cetane Boost.

For up to a seven-point cetane increase, add one oz. of AMSOIL Cetane Boost per five gallons of diesel fuel (one bottle to 80 gallons). For up to a three-point cetane increase, add one oz. per 10 gallons of diesel fuel (one bottle to 160 gallons). AMSOIL Cetane Boost is excellent for use with AMSOIL Diesel Concentrate and AMSOIL Cold Flow Improver.
